Edmentum (Study Island) Benchmarking Assessments

RMS English Language Arts teachers periodically utilize a web-based program to efficiently determine student proficiencies in relation to English Language Arts Common Core Standards.

Edmentum Benchmarking Assessments provide teachers with the ability to customize testing content and obtain detailed results so that they can act upon that information to drive instruction in the classroom. The Benchmarking Assessments program also provides teachers with resources and supplements for targeted skill development.

Please reach out should you desire more information regarding common assessments or any other aspect of the English Language Arts program of instruction.
